

141st Avenue Reservoir, Treatment Plant and Cascade Well 8

The 141st Avenue Reservoir site has been a vital component of the Rockwood Water People's Utility District (RWPUD) for decades. Improvements are needed to the aging infrastructure and to add facilities to support RWPUD's new groundwater supply system.

This project is one of several capital improvement projects through the Cascade

Groundwater Alliance (CGA), a partnership between RWPUD and the city of Gresham, to provide a resilient and high-quality water supply for the area.

Project Highlights:

- New modern reservoir to replace 60-year-old reservoir
- Pump/motor for recently developed onsite well
- Upgrades to existing pump station and electrical
- Seismic upgrades
- New state-of-the-art water treatment plant and backwash tank
- Emergency backup generator
- Associated improvements to service driveway/parking, a stormwater management facility, landscaping, and screening

60-year-old reservoir demolished to build modern one.

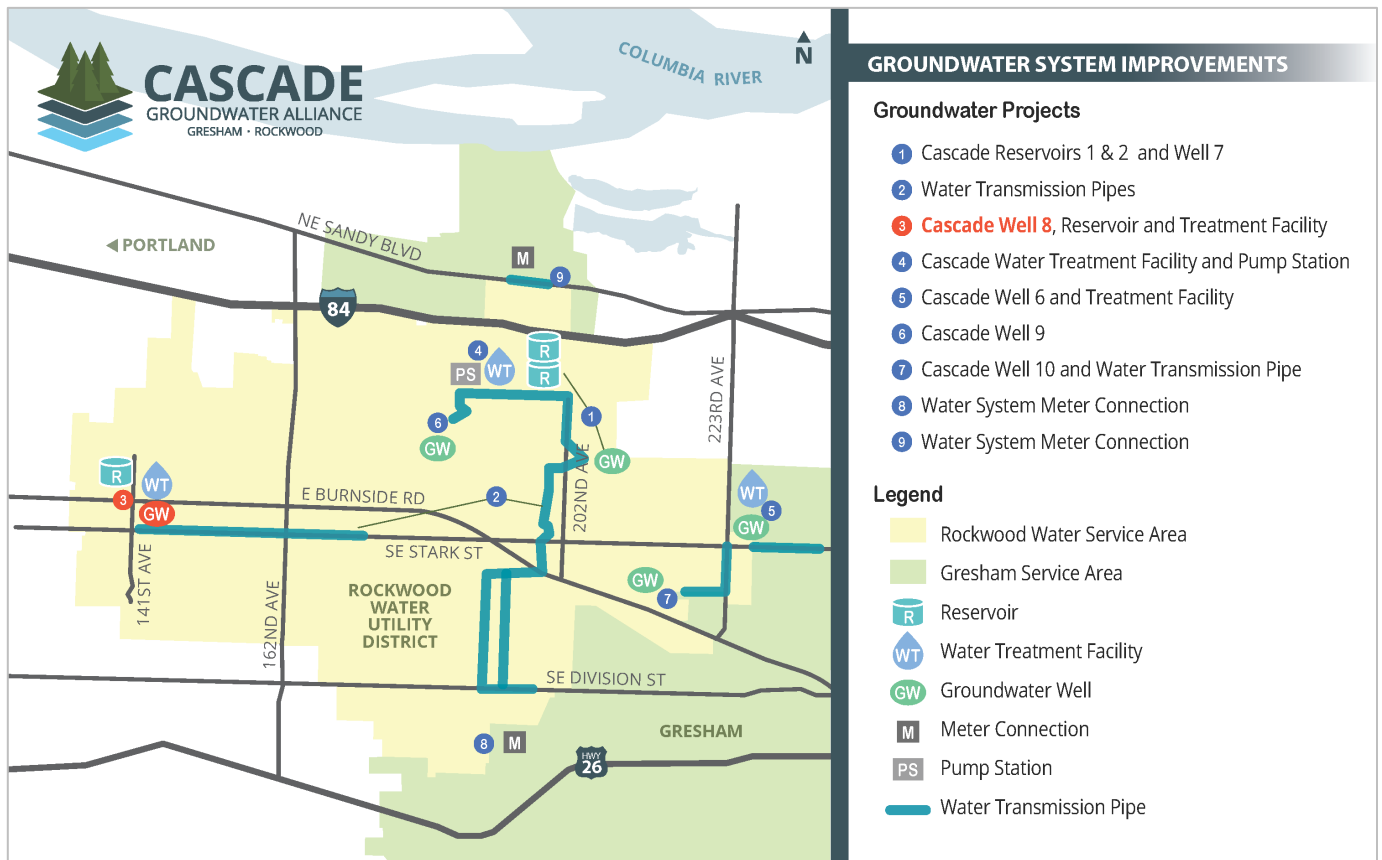

Project Status (Project 3)

Demolish existing and construct a new reservoir	Construction: Fall 2024 – Summer 2025*
Pump station upgrade	Construction: Summer 2025 – Winter 2026*
Treatment Plant	Construction: Summer 2025 – Spring 2026 *

*Dates are estimates only and subject to change

Cascade Groundwater Alliance Project Map

Design and construction of the new groundwater system is underway across the service areas of Gresham and RWPUD in East Multnomah County. Cascade Well 8, Reservoir and Treatment Facility are shown on the map below and are included in project 3.

About the Cascade Groundwater Alliance

The Cascade Groundwater Alliance is a partnership between the City of Gresham and Rockwood Water People's Utility District to build and operate an independent, safe, and reliable water system. For more information:
